Elaborate the sub task that involved in the project. This part will guide you to fulfil all the requirements in the scope. Defining the scope is a neglected area in most projects. **It is however the foundation on which the schedule, budget and resource plans are built. Get it wrong, and everything else will be wrong.** If the scope definition does not run to a few pages, it is probably too short. **Take the time to workshop the scope with users.** Make sure there is a shared understanding. Force the business to think through the project. Use a number of techniques to cross check. **Finally, unless you get the scope right, the project will never be under control and scope creep will likely cause the project to be considered a failure.**
